

ResourceCheck: Assess your District's Resource Use

How well does your district organize its resources to support high performing schools?

Background: For over a decade, Education Resource Strategies, Inc. (ERS) has helped leaders of urban school districts strategically reallocate their resources to improve student performance. Through this work, funded by a grant from the William and Flora Hewlett Foundation, we have identified seven Core Transformational Strategies that support high performing schools; in high functioning districts, resources (people, time, and money) are aligned to support these strategies:

Core Transformational Strategies

1. Ensure equitable, transparent, and flexible funding across schools
2. Restructure the teaching job
3. Support schools in organizing people, time, and money to maximize learning
4. Ensure access to aligned curriculum, instruction, assessment, and professional development
5. Build school and district leader capacity
6. Redesign central roles for empowerment, accountability, and efficiency
7. Partner with families and communities

We have designed this questionnaire to help you better understand how well the resources in your district are aligned to support these Transformational Strategies.

How to Use this Questionnaire: Each of the seven Core Transformational Strategies is broken down into several principles. Each principle has several questions to help you think about your district's practices.

For each principle, rate your district's performance to the best of your knowledge. It is okay to select "don't know," as we do not expect that everyone would know the answers to all questions. Patterns of "don't knows" may be indicators of opportunity for cross-functional discussion.

For questions that have multiple parts, please use your best judgment in picking one of the answer choices.

The last page allows you to view all of your responses at once, which can help you identify patterns of opportunity.

We recommend that several people representing different areas (e.g., CFO, CAO, Superintendent) all complete the questionnaire to provide multiple perspectives.

How to interpret your results: There are two ways to use the results of this questionnaire.

1. If multiple people have completed the questionnaire, the first step is to compare results, and discuss areas of disagreement. This can help increase everyone's understanding of your district's resource use.
2. Principles where you answered "Never"/ "Sometimes"/ "Strongly Disagree" / "Disagree" all indicate areas where current resource use does not support the Transformational Strategy and there may be a resource misalignment. These results will help you prioritize what areas need further investigation and what action should be taken.

Additional resources to help you think about resource use in your district and opportunities for reallocation are available at www.educationresourcestrategies.org/toughtimes.
